

## PROOF OF EXCELLENCE

With government decree 68/2011 (IV.28.) on the Széchenyi Program Offices the Government has established the system of Széchenyi Program Offices to facilitate the implementation of the New Széchenyi Plan and the candidate centeredness announced therein, and to realize the principle of quality and efficiency.

Ownership rights of the **Széchenyi Program Office** Non-profit Consulting Ltd. (hereinafter referred to as the Széchenyi Program Office) are exercised by the **Ministry of National Development**.

A key task of the Széchenyi Program Office is to **promote the resources of the operational programs of the New Széchenyi Plan and to facilitate the use of the development resources**, as well as to **develop the economy** of economically disadvantaged regions, to **improve their quality of life**, and to improve **the market position of the businesses** and workers who live there.

In such an important role it is crucial for us *to utilize the power of collaborative innovation* within the entire organization.

### To achieve our goals we used **Creative Line Group Application**

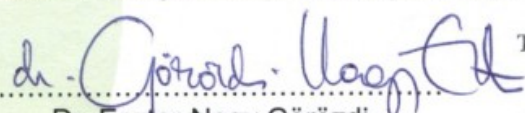

We have definitely managed to build creative communities by successfully activating 220 employees.

Further more, we managed to utilize hidden knowledge, skills and abilities of the entire organization as well as to engage colleagues into active development by bridging the physical gaps in between close working groups.

During our cooperation we were all pleased to work together with  
**CreativeLineGroup.com Ltd.**

I can thoroughly recommend Creative Line Group to those enterprises that require professional support.

Should you have more questions, I am at your disposal.
